Your smartphone is with you wherever you go and now, the power to feed your Pet's is here now. The Smart Feed Automatic Pet Feeder may be a convenient solution that enables you to feed your pet instantly while you're at work. The Wi-Fi enabled feeder connects to your home's wireless router to figure together with your iPhone or Android smartphone letting you feed and monitor your pet's meals anytime. Download the Smart Feed app and customize your Pet's feeding schedule. The feeder holds up to 24 cups of dry food and allows you to plan up to 12 meals every day with portions starting from 1/8 cup to 4 cups to suit your pet's feeding needs. With portion-controlled meals, you'll easily manage your pet's weight if you've got an overeater. And for the longer term design, it also can use voice controller to letting you feed your pet's, like Echo from Amazon and Alexa and other voice command device
